

SABETH HOLLAND SCULPTURES  
THE LOVING MOMENTS

»I think **The Loving Moments** describe so very well of Sabeth Holland when she is creating her sculptures.«

# THE LOVING MOMENTS

With great delight I would like to present here a playroom with 15 sculptures. They were inspired by the sight of real creatures whose movement caught my eye, evoked loving emotions and nestled in my heart. The experiences and impressions condensed and triggered in me the need to realize these inner, very plastic images as sculptures that seem alive and in playful movements.

My Lovables, Lucky Fish and Magic Objects are all originals and handmade by me. I usually begin my work with word sketches and then make drawings and models. Their shape I create in a sculptural process from solid polyurethane, to which I apply a surface texture, which in recent years is also made of polyurethane. The almost finished raw sculpture I work again with carvings and a fine sanding, giving it additional individuality and strength. It is all a time-consuming and dusty process, that I enjoy very much.

And all those long days without colour, I dream of the phase I like the most, when I then apply the cheerful bright colours, immerse myself in the contrasts and apply the many layers of paint. In this way I create a kind of skin or fur, a layer of texture that vibrates, seems mysterious, and reveals rhythm and movement. At the very end, I apply patches of 22 carat gold leaf and give them their shine with layers of varnish and my very secret ingredient.

Although my sculptures are inspired by real beings, I want them to be more than mere images. I am looking for **The Loving Moments** as I know them from the fairy tale world, where fantasy, matter and time can be put together without restrictions. Just enjoy diving into my world.
